I would like to introduce myself, Aras Gedgaudas of Condatus Consulting. I offer Salesforce.com, Google Workspace/Cloud, IT, Marketing/Social Media and business consulting services for small to mid-sized companies like yours, here in North County San Diego.

Google Workspace and Salesforce.com are the future, the two leading platforms for cloud-based email, office productivity and customer relationship management. And making the transition, or improving / expanding your current implementation, is easier than ever.

I bring decades of technical experience, from software architecture and development, to systems planning, implementation, and training. But what separates me from the usual technical consultant is my long business management experience as an Operations-IT-Marketing Executive - from large, complex capital equipment manufacturing to small/mid-sized consumer brand environments.

I hope for the opportunity to speak with you personally and learn about your business. You can email me at aras@condatus.com or call 760-576-4688.

Best Regards,

Aras Gedgaudas
